

84,000,000 lbs concrete  
2,120 loads  
18 straight hours  
0 rejected loads

A GUINNESS WORLD RECORD  
The World's Largest Continuous Concrete Pour  
February 15-16, 2014 – New Wilshire Grand – Los Angeles, CA

When production counts... Count on Jonel

“When you have a job of this magnitude, every load has to be batched within tolerance and as quickly as possible...

The Jonel systems that we use at our production facilities are fast, accurate and have always been something we can count on over the years. This job was no different.”

—Steve Lode, Senior Operations Manager for CalPortland

Our innovative control systems seamlessly automated and controlled the concrete plants laying the foundation for this massive project – which will become the tallest structure west of the Mississippi at over 1,100 feet.
